Navigate Easily Throughout Mathematics Literature Using Enhanced MathSciNet Linking!

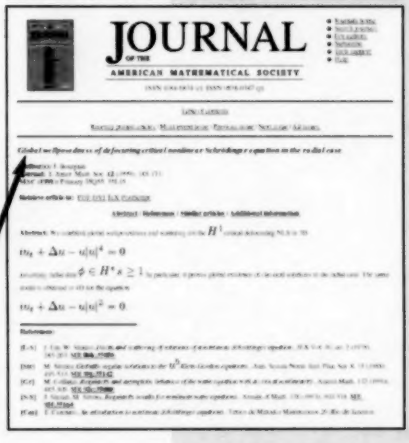
Original Article Links

MathSciNet continues to expand its linking to original articles in online journals. **There are now links to over 178,700 original journal articles**, including from:

- **Institute of Physics Publishing (IOPP)**—10 journals in physics and related areas.
- **Springer LINK**—42 journals in mathematics and related areas published by Springer-Verlag and Birkhauser
- **JSTOR**—expanded coverage now offering 29 historical journals links to articles from 1940 to the present
- **ScienceDirect™**—85 journals from Elsevier Science and other publishers in key subject areas for mathematics and applied math
- **Academic Press**—26 mathematics journals from IDEAL®
- **Oxford University Press**—9 mathematics journals
- **Society for Industrial and Applied Mathematics (SIAM)**—10 journals in applied mathematics fields
- **American Mathematical Society (AMS)**—8 journals
- **American Institute of Physics**—5 physics journals
- **American Physical Society**—5 review journals
- **Johns Hopkins University Press**—*The American Journal of Mathematics*
- **Societe Mathematique de France**—4 journals

Reference Links

Link directly from article references of selected journals to their MathSciNet reviews. You can link from:



- **American Mathematical Society**—article references in all 8 AMS journals
- **ScienceDirect™**—HTML article references in over 1100 journals from Elsevier Science and other publishers
- **IOPP**—article references in 20 journals, including *Journal of Physics A, Classical & Quantum Gravity, Inverse Problems*, and *Nonlinearity*
- **SIAM**—article references in 10 SIAM journals
- ***New York Journal of Mathematics***

I also tried out the links to JSL articles from MathSciNet. This is a terrific service and I am sure many mathematicians will find it extremely useful.

—C. Ward Henson, Professor of Mathematics, University of Illinois

AMS electronic journals provide links from article references to their reviews on MathSciNet. Subscribers to MathSciNet can access these reviews. For users without a MathSciNet subscription, Relay Station allows linking from MR numbers in online mathematical literature directly to electronic journals and original articles.

The American Mathematical Society's electronic-only journal, *Electronic Research Announcements of the AMS* (ERA-AMS), is available on the World Wide Web at www.ams.org/era.

ERA-AMS publishes high-quality research announcements of significant advances in all branches of mathematics. Authors may submit manuscripts to any editor. All papers are reviewed, and the entire Editorial Board must approve the acceptance of any paper. Papers are posted as soon as they are accepted and processed by the AMS.

ERA-AMS offers you ...
- decreased turn-around time from submission to publication
- fast access to your specific area of interest
- up-to-the-minute research information

For more information about this journal for authors, and subscription information, go to www.ams.org/journals/era.

MATHEMATICAL MOMENTS

Securing Internet Communication

No one could shop, pay bills, or conduct business securely on the Internet without the mathematics of encryption. Although based on algebraic facts proved centuries ago, today's sophisticated encryption techniques were formulated within the past twenty-five years.

Public key encryption allows a user to publish the encryption key for all to use, while keeping the decryption key secret. One such algorithm, called RSA, is behind the encryption in modern browsers. The National Institute of Standards and Technology recently adopted an Advanced Encryption Standard that will be used for electronic communication in the years to come. This new standard uses permutations, modular arithmetic, polynomials, matrices, and finite fields to transmit information freely but securely.
